

2nd of Oct, 2023 16:30~18:30

Meeting Room 2 on the 4th floor in the building of
United Graduate School of Agricultural Science

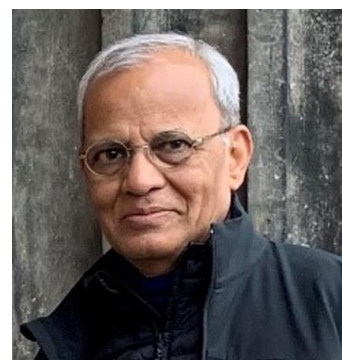

International Meeting

Tokyo University of Agriculture and Technology

Molecular and
Structural Biology

Prof. Inder Saxena

The University of Texas at Austin

Cellulose biosynthesis in plants: What do we know?

In this seminar, Dr. Saxena will trace the evolution of our current understanding of cellulose biosynthesis in plants from a structural (rosettes), biochemical (cellulose synthase assays), genetic (identification of genes for cellulose synthases and other proteins), cell biological (movement of cellulose synthases in the plasma membrane) and molecular (structure of cellulose synthases) perspective.

※Free of charge, Anyone is welcome
